Colour codes

These are colours that I have found in various Toyota reference books and brochures.

They are not complete.

They are not accurate enough for colour matching real paint.

Within each group, lower numbers are for older colours.

Higher numbers (or letters) are for newer colours.

Please email me if you have more colours and fabric types.

Thanks to Jonny, Chris, Greg, Jonathan and [Darren](#) for providing some of these codes.

Some more colours are listed at ...

- [UK Toyota Estima Site.](#)
- [The MR2 MKI Supercharged registry.](#)
- [Auto Color Library.](#)

Interior colour codes and patterns do not match very close across different years and models.

This means that a 1997 Camry with code 11 may be different to a 1997 Corolla with code 11.

Both will probably be different to a 1980 Celica with code 11.

Each will have a different shade of the colour and a different pattern.

All you can say is that a 1997 Camry with code 11 will be the same as another 1997 Camry with code 11.
